Bioelectronic Medicine Forum

April 13, 2027
New York City, NY

Partnering with the Bioelectric Medicine Forum

The Bioelectronic Medicine Forum offers sponsors a valuable opportunity to connect with executives from emerging and established companies, venture capital and investment professionals, and clinical and research leaders advancing the field. Discussions explore investment trends, emerging market opportunities, and the latest advances in bioelectronic therapies and diagnostics. Position your company in front of key decision-makers, showcase your expertise, and build valuable connections with the innovators shaping the future of bioelectronic medicine.

2027 Sponsor Prospectus

PART OF Cambridge Innovation Institute

An Investment and Management Conference for Entrepreneurs and Executives

THE MISSION

This ninth annual meeting represents the premier management and investment conference for the new and emerging bioelectronic medicine industry. Attendees will have an exclusive opportunity to interact with some of the key leaders driving this field forward. The schedule of presentations and panel discussions features a host of experts with a wealth of information on the neuroscience industry and the investment community.

THE AGENDA

Sessions will cover a range of technologies and indications for bioelectronic medicine, including applications in cardiovascular medicine, inflammation, gastrointestinal disorders, and many other clinical specialties. Attendees will hear from some of the leading researchers and entrepreneurs developing clinically and commercially promising products such as implanted vagus nerve stimulation systems to treat hypertension, and surface stimulation devices to treat a range of disorders.

MARKET OUTLOOK

Bioelectronic medicine is garnering increased interest from investors and entrepreneurs as it moves into its next phase of growth. Advances in technology and clinical research are widening the range of conditions these therapies can address, creating new commercial opportunities and improving health outcomes for patients. The forum offers a look at where the market stands, where it's going, who's buying, who's selling, and who is up and coming, allowing you to better plan for the next 12 months and beyond.

About Neurotech Reports

Neurotech Reports delivers timely analysis and forward-looking insights for professionals working across the rapidly evolving neurotechnology sector. Its coverage examines the business, scientific, and technological developments shaping investment, research, commercialization, and company formation.

The publication serves a multidisciplinary audience that includes scientists, clinicians, engineers, entrepreneurs, medical device and biotechnology companies, and investors. Whether supporting the launch of a new venture, evaluating opportunities in an emerging market, applying technical expertise to neurotechnology, or identifying promising investment prospects, Neurotech Reports helps industry stakeholders stay informed about the forces influencing the field's growth.
