The Management and Investment Conference for Neurotechnology Professionals

At this two-day conference, attendees will:

- ➔ Interact with key VC firms in the neuro space
- ➔ Keep abreast of the latest neurotech developments
- ➔ Acquire management insight on issues facing the industry

Register Now at www.neurotechreports.com

Technologies Covered

Neuromodulation
 Neuroprosthetics
 Deep Brain Stimulation
 Neurorehabilitation
 Brain Sensing Technologies
 Bioelectronic Medicine
 Consumer Neurotech

Issues Discussed

Obtaining Financing
 Partnering Opportunities
 Reimbursement Outlook
 Relationships with Bio/Pharma Firms
 Marketing and Distribution
 Developing Clinician Support

Featured Entrepreneurs

NeuronOff, Inc., Valencia, CA. Manufacturer of neuromodulation technology for selective nerve stimulation or block.

SynTouch Inc., Los Angeles, CA. Manufacturer of skin sensors for neuroprosthetic and industrial applications.

Highland Instruments, Cambridge, MA. Manufacturer of noninvasive electrosonic brain stimulation for arthritis pain.

Who Should Attend

- Neurotechnology Executives
- Venture Capital Professionals
- Entrepreneurs
- Healthcare Professionals
- Neural Engineering Researchers

461 Second St. #124
San Francisco, CA 94107

This two-day conference offers an exclusive forum for neurotechnology executives and entrepreneurs to interact with investors, technologists, and potential partners who are actively working to grow this new and exciting industry. The schedule of presentations and panel discussions features a host of experts with a wealth of information on the neurotechnology industry and the investment community.

Sessions will cover a range of technologies and market segments in the neuro space, including neuromodulation, neuroprosthetics, neurosensing, and neurorehabilitation. The first day of the conference features sessions on the market for neuromodulation devices, including an in-depth overview of the industry by Neurotech Reports editor James Cavuoto. Executives from several startup and early stage neurotechnology companies will take part in an Entrepreneur Panel. Keynote speaker Dr. Hunter Peckham, cofounder of the Institute for Functional Restoration at Case Western Reserve University, will discuss his experience as a pioneer in neuroprosthetics. The second day of the conference features sessions devoted to bioelectronic medicine, neurorehabilitation, and neurodiagnostics. Representatives of several new-frontier neurotech companies will make presentations as well as users of the new technology.
