2020

The Management and Investment Conference for the Bioelectronic Medicine Industry

At this conference, attendees will:

- ➔ Interact with key VC firms in bioelectronic medicine
- ➔ Keep abreast of the latest technology developments
- ➔ Acquire management insight on issues facing the industry

Register Now at www.neurotechreports.com

Technologies Covered

Bioelectronic Medicine
Vagus Nerve Stimulation
Peripheral Nerve Stimulation
Surface Stimulation Devices
Wearable Therapies
Electrode Design

Issues Discussed

Obtaining Financing
Partnering Opportunities
Reimbursement Outlook
Relationships with Bio/Pharma Firms
Marketing and Distribution
Developing Clinician Support

Featured Entrepreneurs

Synergic Medical Technologies, Inc., Eugene, OR. Developer of noninvasive neuromodulation systems for improving motor function in Parkinson's disease.

Bionic Vision Technologies, Inc., Melbourne, Australia. Manufacturer of suprachoroidal visual implant to restore functional vision to the blind.

Paradromics, Inc., Austin, TX. Developer of data-driven implantable brain computer interface technology.

Micro-Leads Medical., Somerville, MA. Manufacturer of HD64 high-resolution spinal cord stimulation system for treating pain..

Synergia Medical, SA., Mont-Saint-Guibert, Belgium. Developer of implantable optical neurostimulation devices.

Thermaquil, Inc., Philadelphia, PA. Developer of nerve-blocking technology for implantable devices.

Evren Technologies, Inc., Newberry FL. Manufacturer of wearble vagus-nerve stimulation systems for treating neuropsychological disorders.

2020

This third annual meeting represents the premier management and investment conference for the new and emerging bioelectronic medicine industry. Attendees will have an exclusive opportunity to interact with some of the key leaders driving this field forward. The schedule of presentations and panel discussions features a host of experts with a wealth of information on the neuroscience industry and the investment community.

Sessions will cover a range of technologies and indications for bioelectronic medicine, including applications in cardiovascular medicine, inflammation, gastrointestinal disorders, and many other clinical specialties. Attendees will hear from some of the leading researchers and entrepreneurs developing clinically and commercially promising products such as implanted vagus nerve stimulation systems to treat hypertension, and surface stimulation devices to treat a range of disorders.

The conference is produced by Neurotech Reports, the publisher of the *Neurotech Business Report* newsletter, and the leading publishing and market intelligence firm covering the neurotechnology industry. We are currently recruiting speakers and presenters for the 2020 event. Contact us for more information if you are interested in participating as an Entrepreneur Presenter.

Hotel Information

The 2020 Bioelectronic Medicine Forum will take place at the Millennium Times Square New York. To reserve a room, call the hotel at 212 768 4400.
