Technologies Covered

Neuromodulation
 Neuroprosthetics
 Deep Brain Stimulation
 Neurorehabilitation
 Brain Sensing Technologies
 Bioelectronic Medicine
 Consumer Neurotech

Issues Discussed

Obtaining Financing
 Partnering Opportunities
 Reimbursement Outlook
 Relationships with Bio/Pharma Firms
 Marketing and Distribution
 Developing Clinician Support

Featured Entrepreneurs

NeuroGeneces, Santa Fe, NM. Developer of neurotechnology system focused on improving memory and slowing cognitive decline.

Braingrade, Berlin, Germany. Early stage neurotechnology company developing a neuroprosthetic for learning and memory.

BIOS, Cambridge, U.K. Manufacturer of AI-based platform for extracting neural signals for closed-loop neuromodulation therapies.

 461 Second St. #124
 San Francisco, CA 94107

This two-day conference offers an exclusive forum for neurotechnology executives and entrepreneurs to interact with investors, technologists, and potential partners who are actively working to grow this new and exciting industry. The schedule of presentations and panel discussions features a host of experts with a wealth of information on the neurotechnology industry and the investment community.

Sessions will cover a range of technologies and market segments in the neuro space, including neuromodulation, neuroprosthetics, neurosensing, and neurorehabilitation. The first day of the conference features sessions on the market for neuromodulation devices, including an in-depth overview of the industry by Neurotech Reports editor James Cavuoto. Executives from several startup and early stage neurotechnology companies will take part in an Entrepreneur Panel. Keynote speaker Bryan Johnson from Kernel will share his insights on neuroscience as a service and other leading-edge topics. The second day of the conference features sessions devoted to noninvasive stimulation, brain-computer interfaces, and new therapies for treating paralysis. Representatives of several new-frontier neurotech companies will make presentations as well as users of the new technology.
